## **INTRODUCTION**

**A quick internet** search would give **a good idea** of the hype surrounding **TCASE tokens**. If one is into trading then it is something one should consider delving into.

**STAR TCASE was born** on **the idea** of a **solar** housing (**CHARGER**) that we have developed and achieved many milestones, **now STAR TCASE** has evolved to **a higher level**, where it has a **great ecosystem**.

When a **person invests in a utility token**, they get a definable profit **in return**. But what exactly is it and how does it work? That is something this white paper will clarify.

**TCASE** token will play an **important role** on all businesses.

## **WHAT IS THE TCASE TOKEN?**

Mainly, **TCASE is a BEP-20 token**, where we intend to **revolutionize the way of working** regularly, or at least **we are going to integrate it by collecting invoices from our clients** who come from the active **maintenance and electrical installation business**, among **other businesses**.

**Our** main objective is to **satisfy day-to-day needs**, in addition to constantly starting new **businesses** that allow the **ecosystem** to grow, among them we highlight the **development and innovation of new products related to renewable energies**, among others a kind of **rustic resort where plots are rented with bungalows for the weekend**, and you can only pay with **TCASE**. Another business to highlight and that there is a **good demand** for the product is a **snail farm**. Also let's not forget the **launch of the game** and implementation of the **Metaverse** as far as **possible and what current technology** allows us to **develop**.

The **TCASE token is the new investment tool** that is anticipated to replace the trading we are currently working on. There are certain criteria that must be met to be considered a token of our utility:

- The **Token** must be a **financial investment**, that is, it must **have value**.
- That **our clients accept** it as a bargaining chip, **which is very possible**.
- **Reach 1,000 holders**, when acquiring the token, the **holder will obtain** a profit, **Cake/LP** in his portfolio without doing anything, just holding and **benefiting** from **purchases and sales**. It's a way we have to **reward everyone** for the **support**.
- The profit is currently **generated by TCASE** tokens. That's why **we need** to be well **received** by the **holders** and where we will **respond with rewards, scalability** and **stability**

## **ADVANTAGES OF TCASE TOKENS**

The reputation of crypto investment is growing. In **STAR TCASE** there is already an active business that ***provides liquidity in 20% of profits.***

The main activity is electrical installations and private and industrial maintenance. With which, the increase in the value of the token will be revalued over time.

**Renewable energies** are one of our strengths, as well as **electric car charging** points.

The use of smart contracts further simplifies the trading process. At the same time, the transaction speed also increases.

Token security facilitates global business relationships because trading is done over the Internet and is not restricted to certain countries. This also helps create a broader investor base.

**Exclusive and innovative products** developed entirely by us. **All holders** will have the option to opt for them, ***if you are not a TCASE holder it will not be possible*** to acquire our products or services.

**Tournaments** between players participating ***in the game.***

Raffles of **NFTs** and **tokens for holders** through twitter the winners will be announced.

### **Positive:**

- There is ***already an infrastructure***
- There is already a ***source of financing*** for an existing business
- We have ***land owned***
- We have ***registered intellectual property***
- The ***token is already*** created and ***launched*** to the ***market***

### DISADVANTAGES OF TCASE TOKENS

The only disadvantage that TCASE could have is that it would not be accepted by the holders or our clients, that would be fatal for our ecosystem, but knowing that we constantly innovate, we do not believe that it will be a problem.

Also, an investor must understand how difficult it is for *people to believe in something they think is a scam*.

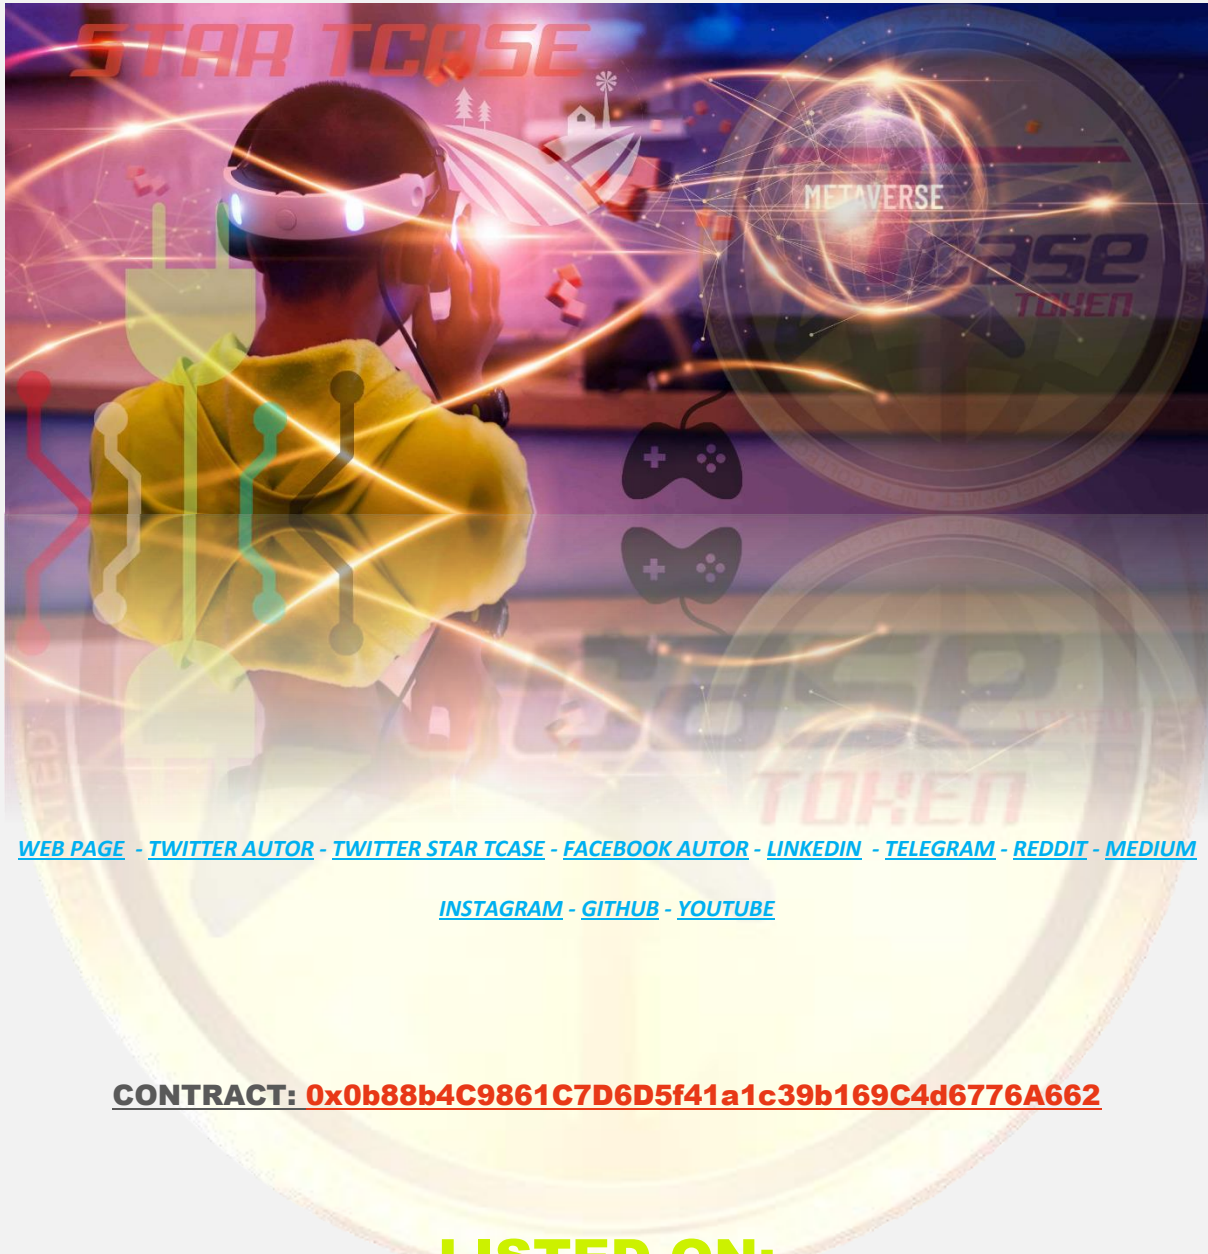

### CONCLUSION

**TCASE TOKEN** is going to change the traditional *trading environment* a lot in the not too distant future. At least your life will also change a little if you *relate to this ecosystem*.

Things will become much greener since most *technology* is not effective, that's what we've come for, to change the way we pay our bills as well as offer an innovative and entrepreneurial *ecosystem of new opportunities*. **All in all, it will be an interesting future.**
